**CASE REPORT****NARRATIVE**

17-5919

Assault 2

Cpl De Aguiar

02-18-17

On 02-18-17, I was dispatched to Fair Fax Hospital on an Aid Response. Upon my arrival I observed Aid 29 leaving the parking lot. I stopped the Air Unit and was informed that they were transporting a burn patient to Harbor View Medical Center.

I went into Fair Fax Hospital and contacted the receptionist. I asked if she called for an assault report. She did not know what I was talking about. She contacted the nursing staff, she related that none of the nurses called police.

As I was leaving, a nurse came out to the lobby and contacted me. She related that the nurses did not call the police. However they did call for Aid to transport a patient to Harbor View. The patient who got hot liquid thrown on her face needed to be transported.

The nurse informed me that the patient did not want police to get involved.

At about 1300 hours, I was dispatched to a follow up to this call. The Social Worker [REDACTED] from Harbor View Medical Center called wanting to know more information about the burn subject [REDACTED] who was transported to them from Fair Fax. I informed [REDACTED] that I did not talk to her. [REDACTED] related that the emergency room doctor wanted to know more about the case because the patient will be admitted to the hospital for treatment of her injuries.

I asked [REDACTED] about the injuries, she related that she could not tell me the exact degree of burns, but she mentioned that the skin is blistering from her face to her chest.

I asked [REDACTED] if I would be able to talk to [REDACTED]. She related not at this time. She stated that for burn patients rest is very important and [REDACTED] is sleeping currently so the medical staff

## CASE REPORT

### NARRATIVE (continuation)

preferred that she not be waken.

Due to the seriousness of the injuries (blistering Skin). I continued this investigation for documentation.

I contacted Norcom and asked about the aid call and the notes that Aid personnel put in the call.

The Aid call was made by Nurse [REDACTED] for patient [REDACTED] who suffered a skin injury this morning at about 0645 hours when another patient [REDACTED] got into a verbal agreement and threw a cup of hot tea into [REDACTED] face.

I contacted [REDACTED] via phone at the hospital. She related that she arrived to work at 0700 hours and was told of the incident that occurred around 0645 hours. She related that the above information was accurate on her account. She said that when she checked on [REDACTED] she was sleeping. She recently got up and [REDACTED] noticed [REDACTED] Facial Skin was blistering. She assessed the injuries with other nurses, then decided that [REDACTED] needed to be treated from an outside hospital who is capable of treating skin injuries. That is when [REDACTED] call for the Aid unit. [REDACTED] asked [REDACTED] if she wanted to file a police report but [REDACTED] declined to file a police report.

I informed [REDACTED] that I will still have to file a report, even if [REDACTED] does not want to pursue assault charges.

I also asked [REDACTED] for a copy of the security video of the incident. She related that she does not have access to the recorder and that the person who does is [REDACTED] however he does not come back to work until Tuesday. She said that she will leave a message for [REDACTED] to make a copy of the incident. She said that she will have [REDACTED] call the police when the copy is ready for pick up.

I informed [REDACTED] that the report will be for documentation.

This case should be forwarded to investigations for possible charges.
